Rent an Admin

IDENTITY SECURITY AND DEVOPS ADMINISTRATION EXPERTISE

Your very own Ping Identity and DevOps SME that you don't have to train or provide benefits to.

LikeMinds offers clients a comprehensive Identity and Access Management service called Rent an Admin to solve challenges and manage the Governance, Operations, and Application onboarding processes as part of a transition to an IAM Managed Service. Like Minds has been delivering and supporting IAM implementations since 2007 on different IAM tools and products ranging from Oracle, Microsoft, and IBM to the complete Ping Identity suite of products through the Rent an IAM Admin Service.

Level 3 Support

24/7 Rapid Response Escalation Process

- Troubleshoot production outages

INTRODUCING AUTHENION – A SINGLE UNIFYING SSO SOLUTION

GIVE SECURE ACCESS TO ORACLE AND CUSTOM APPLICATIONS
WITH AUTHENION AND PINGFEDERATE/PINGONE

Authenion provides a single sign-on (SSO) solution for your Oracle Enterprise applications and custom applications (Java, PHP,.Net, etc.) that support the HTTP Headers for Last Mile SSO integration. Featuring a lightweight, highly scalable architecture, Authenion is fully compliant with OpenID Connect 2.0 standards

HOW DOES AUTHENION WORK?
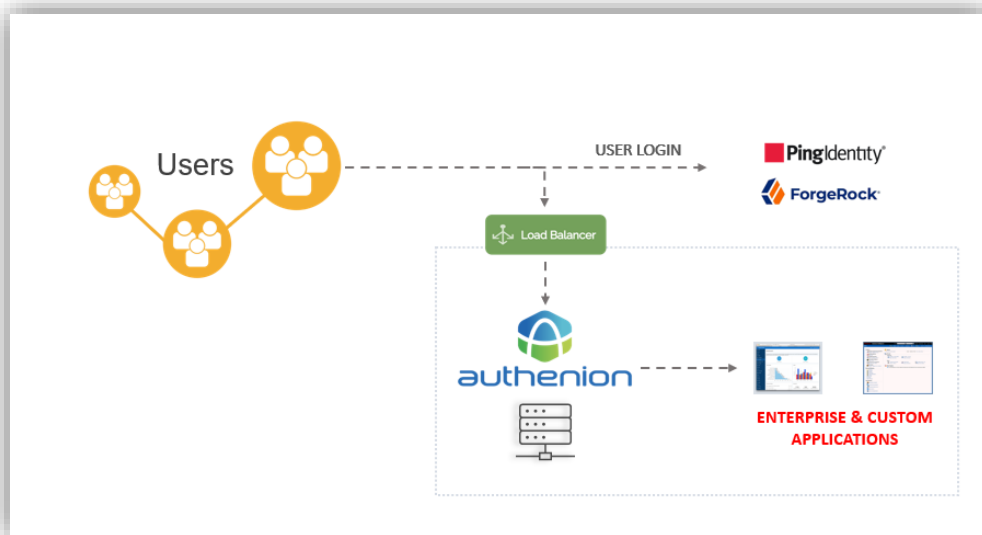

FEATURES

- Serves as first line of defense by intercepting the user requests and provide SSO to all your applications.,
- Fully compliant with OpenId Connect 2.0 Standards
- Light weight product and requires less hardware. Market leading performance and scalability and has a highly scalable architecture

BENEFITS

- Customers can experience reduced vendor lock and increased flexibility with infrastructure built on Open Standards
- Authenion can be installed in On-premises, cloud or hybrid architecture in your infrastructure
- The Solution provides improved user experience with reduced password
